### SQL SELECT, WHERE, DISTINCT practice

1. Write a select statement to return all columns and rows from the customer table.

```
SELECT * FROM customer;
```

2. Write a query to select first name, last name, and email from the customer table.

```
53 SELECT first_name, last_name, email  
54 FROM customer;
```

3. Write a query to return all rows and columns from the film table.

```
56 SELECT * FROM film;  
57
```

4. Write a query to return unique rows from the release\_year column in the film table.

```
58 SELECT DISTINCT release_year FROM film;
```

5. Write a query to return unique rows from the rental\_rate column in the film table.

```
59 SELECT DISTINCT rental_rate FROM film;  
60
```

6. A customer left us some feedback about our store. Write a query to find her email address – for Nancy Thomas.

```
62 SELECT email FROM customer  
63 WHERE first_name = 'Nancy' AND last_name = 'Thomas'  
64
```

7. We're trying to find a customer located at a certain address '259 Ipoh Drive' – can you find their phone number?

```
67 SELECT phone FROM address
68 WHERE address = '259 Ipoh Drive'
69
```

8. Write a query from the customer table, where store id is 1 and address id is greater than 150.

```
69
70 SELECT * FROM customer
71 WHERE store_id = 1 AND address_id >150
72
```

9. Write a query from the payment table where the amount is either 4.99 or 1.99.

```
72
73 SELECT * FROM payment
74 WHERE amount=1.99 OR amount =4.99
75
```

10. Write a query to return a list of transitions from the payment table where the amount is greater than 5.

```
76 SELECT * FROM payment
77 WHERE amount>5;
```
